Unruffled by 14 P. C. Money

Rise in Call Rate and Cut in Inspiration Copper Dividend Fail to Bring Increased Selling

There were several developments yesterday that might have been made the basis for aggressive selling operations had the professional element the courage or the disposition to take a more definite position on the short side of the stock market. One was the rise in call money to 14 per cent, the highest rate since early April. Another was the unexpected reduction in the Inspiration Copper dividend. But stocks generally displayed as much stolidity to these developments as they have of late to favorable influences. The market simply refused to be stirred from its lethargy and stocks moved irregularly, displaying early strength and then settling off in an exceedingly unimpressive session.

The rise in call money to a level well above the highs of recent days—the top quotation previously this week was 11 per cent—proved interesting, even if it did not cause any commotion in stocks. Occurring at a time when the demands for money for speculative purposes had been reduced to the barest minimum by the effect of the general slowing down of activity, it pointed to an extremely sensitive money market and emphasized the limited offer of funds available at the moment. The situation is one that obviously will prevent anything like a revival of speculation. After the end of the month the money position may be somewhat easier, although the dangerous to make predictions for the reason that the continuation of transportation difficulties is still operating to tie up a huge mass of banking credit. So far as the stock market is concerned, the outlook as it will be kept on short money rations for some weeks yet, which will, of course, militate against the successful resumption of bullish operations.

Announcement of the reduction in the dividend by the Inspiration Copper directors caused some selling of copper shares, but it was evident from the resistance offered by the group that the unfavorable conditions under which the copper producing companies have been operating for many months had been more or less anticipated. Reductions in dividends have already been made by a number of the other leading producers.

The largest fluctuations in the market yesterday took place in the special issues, stocks which were affected by special influences. Among them were United States Industrial Alcohol, United States Chemical, and American Locomotive. The latter, after the announcement of the declaration of an extra dividend of 2 per cent. Dealings in Steel common stock fell to less than 100 shares, the smallest turnover for the stock in more than a year. Baldwin Locomotive, which has been in the hands of a pool, continued to display firmness.

Money and Credit

The dearth of call money offerings yesterday offered further evidence that the strain occasioned by the June 15 tax payments and preparations for meeting the July 1 interest and dividend disbursements by the banks had not yet been completed. The call rate, after renewing at 12 per cent, advanced at the close to 14 per cent, the highest rate since April 30. Time money continued dull with offerings greatly restricted. Current rates follow:

Call money..... 14%
On mixed collateral..... 8%
On industrial collateral..... 9%
Time money (mixed collateral)..... 8%
Sixty days..... 8 1/2%
Ninety days..... 8 3/4%
Four months..... 8 1/2%
Four to six months..... 8 1/2%
New York City..... 8 1/2%
Silver—London, 50 1/4; New York, domestic, 99 1/2; foreign, 90; Mexican dollars, 68 1/2.

Sub-Treasury—United States funds: Reserve credit balance, \$70,000,000.
Canadian Exchange—New York funds in Montreal, \$138.75 premium per \$1,000; Montreal funds in New York, \$121.84 discount per \$1,000.

The Dollar in Foreign Exchange

Sterling closed steady yesterday and the continental exchanges were firm. France, lire and marks moved slightly upward in the afternoon, after having reacted in the forenoon.
